

Environmental Health

Dedicated to the advancement of the environmental health professional

Volume 72, No. 9 May 2010

ABOUT THE COVER

The illustration on this month's cover reflects the enormous breadth of knowledge and skills that EH jobs require. The authors of this month's cover article, "Assessment of Qualifications Needed

by Environmental Health Graduates Entering Private-Sector Employment," set out to document the knowledge, skills, and abilities that private-sector EH employers seek in entry-level employees. At the top of the list were knowledge about state and federal regulations; a four-year, science-based undergraduate degree; some experience in the given industry; and critical-thinking and problem-solving skills.

See page 14.
