Blue skies, pristine beaches, and a gentle Mediterranean climate describe the backdrop for the 76th NEHA Annual Educational Conference (AEC) & Exhibition in San Diego, California! The 2012 AEC took place June 28–30. It was confirmed that attendees enjoyed San Diego as a conference destination when at the President’s Banquet, NEHA’s Executive Director Nelson Fabian mentioned that he had been told over and over that all NEHA AECs should be held in San Diego, and the crowd roared with applause!

But it wasn’t only the destination of San Diego that drew approximately 1,100 attendees—an increase from the prior year—it was also the draw of all the training and educational sessions, opportunities to network, and the motivational and inspirational teachings from keynote speaker and senior futurist, Thomas Frey. (Check out Frey’s regular Journal column on page 46 to get an idea of the intriguing and thought-provoking nature of his keynote address). The different facets of the conference—training, education, networking, policy involvement, advancement, and motivation and inspiration—enabled attendees to customize their own learning experiences. From the multitude of environmental health topics to the different learning environments of the Lectures and Learning Labs to the option to attend in-person or virtually, the 2012 AEC offered a fresh, progressive, and modern approach to training and education.

Over a year of planning goes into each AEC. This year’s planning committee continued to build upon the multifaceted structure of the event, building upon prior successes and evolving to continue to meet the needs of the environmental health professionals in attendance. The AEC is truly one of NEHA’s crowning programs that supports and furthers NEHA’s mission to advance the environmental health and protection profession for the purpose of providing a healthful environment for all.

The following pages provide a summary of the different facets that made up this year’s extraordinary AEC. While text and photos fail to fully represent the amazing atmosphere and broad scope of the AEC, they do highlight just how much goes on, how energized people feel, and how special this event is to NEHA and to those in attendance.
Green Initiatives at the AEC

NEHA continues to improve its efforts in greening the AEC:

- All items from the conference recycled at the hotel were weighed and NEHA **recycled over 211 pounds**. NEHA will use this information to improve its sustainability efforts in the future.
- Online registration and e-mail communications with attendees increased.
- A $10 surcharge was automatically assessed on hard copy registrations and was donated to TerraPass (www.terrapass.com) to offset the carbon emissions that resulted from paper waste. Also, attendees were encouraged to donate to TerraPass.
- A volunteer community event was held to offset the event’s carbon footprint.
- Eco-friendly name badge ribbons were used.
- Staff and volunteers involved in the on-site registration desk were made aware of environmental policies.
- The number of hard-copy brochures sent to potential attendees was reduced by implementing an online promotional strategy, which helped cut waste produced by printing and mailing hard copies.
- The production of the conference CD was eliminated by offering these resources through the Virtual AEC instead.
- Program guides were printed locally to reduce shipping and handling.
- The “greening” of the exhibit hall was improved by creating awareness and providing training to exhibitors about ways they can help reduce waste of many forms.
- The number of cars rented by conference attendees was reduced by promoting the various alternative transportation modes offered by the City of San Diego.
- Leftover food was donated to a local charitable food distributor and to the hotel employee cafeteria.
- Food waste was composted.
- A percentage of food was prepared for all meals as vegetarian or vegan.
- Condiments were served in bulk containers whenever possible.
- Car rental companies that have green initiatives in place and opportunities for attendees to purchase carbon offsets were recommended.
- Airlines that have green initiatives in place and opportunities for attendees to purchase carbon offsets were recommended.

Host Hotel Green Initiatives

- Received the San Diego Excellence in Energy Award from the Center for Sustainable Energy.
- Certified by the Clean Marinas California Program.
- Uses energy efficient lights throughout the facility.
- Uses low-flow water fixtures.
- Purchases local food whenever possible.
- Adheres to a comprehensive recycling program.
- Provides all meeting rooms with filter water coolers.
- Composts leftover food.
- Purchases 100% recycled and biodegradable carryout bags, cups, and lids.
- Adjusts thermostats and turns of lights in vacant rooms.

<tr>
<td>NEHA 2nd Annual Volunteer Community Event</td>
<td>Seventeen participants worked with Park Ranger Carole to clear 80 yards of brush in San Diego’s beautiful and historic Balboa Park that will be reused as mulch. Volunteers got to enjoy the outdoors, great camaraderie with their fellow NEHA volunteers, and giving back to the community. Ralph’s Supermarket donated $25 in gift certificates and all volunteers received a NEHA water bottle. Upholding the principles of sustainability, volunteers also walked, rode the bus, took the trolley, or carpooled with a hybrid car to and from the event. Thank you to all of the volunteers for their hard work! Below is a list of volunteers.</td>

**NEHA AEC 77th**

Save the Dates Washington, DC • July 9–11, 2013

Start planning your attendance to the NEHA AEC.
For preliminary information and pricing visit neha2013aec.org.
The educational lineup at this year’s AEC was outstanding in terms of both quantity and quality. Quantity-wise, 137 educational sessions covering 18 different areas of environmental health, three credential courses and exams, four preconference workshops, two poster sessions, and two off-site field trips were offered. Quality-wise, cutting-edge infrastructure including the Virtual AEC, incorporating return on investment (ROI) principles, and new educational tracks were integrated into the overall structure of the conference. With so much information packed into three days, as one attendee stated, “Society is ever changing and this conference provides so many new ways to combat the challenges those changes present to the environmental health field.” Another attendee stated, “This conference and exhibition provide a great opportunity to learn new skills and enhance existing skills to improve environmental health services within the community.”

NEHA’s AEC again implemented ROI principles into the education and training structure. ROI principles work to ensure that attendees can return to their workplaces with the ability to more than pay for their trip to the conference by using what they learned at the event. NEHA’s AEC planning committee identified objectives that the 2012 conference aimed to meet. Examples of these objectives included providing education and training that are relevant to attendees’ jobs and ensuring attendees met at least five new colleagues in environmental health to contact for professional suggestions or sharing of best practices. For a complete listing of all the ROI objectives the 2012 AEC was designed to meet, please visit www.neha2012aec.org/roi.html.

The Lecture and more interactive Learning Lab sessions constituted the main structure of the conference again this year. Outstanding speakers from a vast array of disciplines in environmental health presented on pertinent emerging topics. In the Lecture sessions, presentations on the Food Safety Modernization Act, all-hazards preparedness, and the keynote presentation drew large numbers of attendees. Likewise, the raw milk presentation, body art, and drop-in Learning Lab sessions provided education and training that are relevant to attendees’ jobs and ensuring attendees gained practical hands-on experience that can be used in their daily work.

An expert panel provided a lively discussion on the programs and tools being created to help respond to food safety disasters.

Session rooms were packed with attentive attendees eager to learn from the 137 educational sessions offered at the AEC.

Environmental Health Topics Covered
- Children’s environmental health;
- emerging environmental health issues;
- environmental health impact assessments;
- food protection and defense;
- general environmental health;
- hazardous materials and toxic substances;
- healthy homes and communities;
- informatics, leadership, and management;
- injury prevention and occupational health;
- international environmental health;
- onsite wastewater systems;
- pathogens and outbreaks;
- recreational waters;
- sustainability and climate change;
- technology and environmental health;
- terrorism and all-hazards preparedness;
- uniformed services;
- vector control and zoonotic diseases; and
- water quality.

NEHA’s Technical Advisors
- Ambient Air—Scott Holmes, REHS/RS;
- Children’s Environmental Health—M.L. Tanner, HHS;
- Disaster/Emergency Response—Vince Radke, MPH, REHS, CP-FS, DAAS;
- Drinking Water—Robert Warner, CP-FS;
- Emerging Pathogens—Lois Maisel, RN, CP-FS;
- Environmental Justice—Sheila D. Pressley, PhD, REHS/RS;
- Food (including Safety and Defense)—John A. Marcello, REHS, CP-FS;
- General—Eric Pessell, REHS;
- Hazardous Materials/Toxic Substances—Priscilla Oliver, PhD;
- Healthy Homes and Healthy Communities—Sandra Whitehead, MPA;
- Indoor Air—Thomas H. Hatfield, DrPH, REHS, DAAS;
NEHA was pleased to again offer the Virtual AEC to attendees and to those who were not able to make it to the AEC in San Diego. With current budget cuts and demanding workloads NEHA understands that it is difficult for some environmental health professionals to get the approval and support to attend events like the AEC. The Virtual AEC provided those individuals with the opportunity to share in the AEC experience right from their office or home desks.

Over 30 educational sessions were recorded live during the AEC in San Diego and virtual attendees were able to view the sessions as they happened and ask questions of the speakers almost as if they were sitting right there in the rooms. Additionally, virtual attendees were able to connect with AEC attendees, speakers, and exhibitors through networking tools available in the Virtual AEC. The Virtual AEC also provided attendees with access to speaker handouts and other materials and the opportunity to earn continuing education credits.

The Virtual AEC was available to those who attended the conference in San Diego—free of charge—as a valuable part of their registration package. Before even getting to San Diego, attendees were able to build their own schedules of training, networking, and advancement opportunities to take advantage of while at the AEC. The Virtual AEC also offered attendees greater flexibility to attend more sessions (and learn more) by being able to access the recorded sessions after the conference at their own convenience. Plus, attendees can go back and continue to review recorded sessions as many times as they would like for a year!

Although the 2012 AEC has ended in San Diego, the Virtual AEC continues to provide access to valuable educational content and networking opportunities. If you were not able to attend in San Diego and have not done so yet, you too can have access to these items by registering for the Virtual AEC. Visit neha2012aec.org to register today!
Board of Directors Meeting Highlights

NEHA’s board of directors meets four times a year. One meeting is always held at the AEC. Highlights from this year’s board meeting include the following.

1. Executive Director Nelson Fabian explained the process for selecting an individual to fill the now-vacant Region 8 vice president position. NEHA will mail a letter to all NEHA members of that region (Delaware; Maryland; Pennsylvania; Virginia; Washington, DC; West Virginia; and members of the U.S. armed forces residing outside the U.S.). Each NEHA member will be invited to prepare nominations material on their behalf. By the time of the board’s October meeting, an appointment will be made. The term of the appointment will run through June 2015.

2. AEC & Exhibition Topics
   a. Executive Director Fabian reported that the AEC in San Diego was the best attended AEC in four years.
   b. Executive Director Fabian indicated that the board’s selection of Las Vegas for the NEHA 2014 AEC was well received in Vilnius, Lithuania, by the International Federation of Environmental Health (IFEH) members. NEHA will host the IFEH Congress at the 2014 AEC and expects over 200 attendees from around the world.
   c. Executive Director Fabian informed board members about the separate Center for Priority Based Budgeting (CPBB) conference occurring at the Omni Hotel. While a much smaller conference than the AEC, the CPBB conference focused on local government decision makers and financial planners. He added that CPBB has worked out arrangements to develop two apps that will be supported only by the CPBB’s platform. He explained that the International City/County Management Association has been so impressed with CPBB that it has offered to cosponsor an event in Washington, DC, at the 2013 AEC.

3. AEC & Exhibition Topics
   a. Executive Director Fabian reported that the 2012 AEC in San Diego was the best attended AEC in four years.
   b. Executive Director Fabian indicated that the board’s selection of Las Vegas for the NEHA 2014 AEC was well received in Vilnius, Lithuania, by the International Federation of Environmental Health (IFEH) members. NEHA will host the IFEH Congress at the 2014 AEC and expects over 200 attendees from around the world.
   c. Executive Director Fabian informed board members about the separate Center for Priority Based Budgeting (CPBB) conference occurring at the Omni Hotel. While a much smaller conference than the AEC, the CPBB conference focused on local government decision makers and financial planners. He added that CPBB has worked out arrangements to develop two apps that will be supported only by the CPBB’s platform. He explained that the International City/County Management Association has been so impressed with CPBB that it has offered to cosponsor an event in Washington, DC, at the 2013 AEC.

4. The board reviewed the work of a subcommittee chaired by Regional Vice President (RVP) John Steward. The subcommittee collaborated to develop updated definitions of environmental health and environmental health professional. RVP Steward asked board members to submit their feedback to him and he plans to hold additional meetings with the subcommittee. RVP Steward indicated that he would present a finalized set of definitions to the board at its October meeting for approval.

5. Environmental health postage stamp: Guest Ben Gale explained the process required for the U.S. Postal Service to approve a new postage stamp. The board approved a resolution supporting the development of a national campaign to petition the Citizen’s Stamp Advisory Committee of the U.S. Postal Service to develop, approve, and issue a commemorative stamp honoring the environmental health profession.

6. New NEHA awards: RVP David Ludwig provided additional details on the administration of the two new NEHA awards—the Environmental Innovation Award and the Education Contribution Award—inviting additional input from board members.

Town Hall Assembly

For a second year in a row, the Town Hall Assembly was well attended. Attendees were treated to breakfast, which was generously sponsored by the National Restaurant Association. NEHA President Mel Knight called the meeting to order and David Crownover from the National Restaurant Association provided a welcome. President Knight gave a report on the status of the association over the past year, which highlighted many of the activities NEHA has been engaged in, as well as future directions. NEHA’s election process and results from the 2012 election were shared. Furthermore, nominations from the floor for second vice president were opened up and no nominations were given. The only candidate for the second vice president position is current RVP David Riggs. A special presentation from Managing Director Larry Marcum was given on the status of NEHA’s grants, contracts, and government affairs program. The floor was then opened up to any member comments and President Knight closed the meeting by thanking all for attending.
Exhibition

The exhibition is a key event held at the AEC each year because it provides a prime networking opportunity for professionals to connect with exhibitors who can provide the products, services, and knowledge needed for environmental health professionals and their organizations to continue to improve their programs and operations. This year’s exhibition provided a lively, face-to-face interaction between attendees and nearly 80 exhibitors.

Winning is always fun, and this year we had some fun door prizes to give away during the exhibition. Jason Boothe was the winner of a waterproof camcorder, perfect for sightseeing in San Diego! Adrienne Palmer was the lucky winner of the Kindle e-Reader, generously donated by Decade Software Company, LLC. And Bjorn Listerud won a fantastic TomTom navigation device. Many thanks to our door prize sponsors for their generous contributions!

Silent Auction

This year’s Silent Auction was another success! Sixty-one items made their way to the tables from our very generous NEHA members, affiliates, exhibitors, and sponsors. The $2,880 that was raised from this event will go to NEHA’s 2013 AEC speaker fund.

A sampling of this year’s items includes the following.

- Swarovski crystalline pen with USB memory key
- U.S. flag flown over U.S. Capitol Building
- Gift cards for Munson’s Chocolates, Cabella’s, Best Buy, Taste of Chicago, and Fiesta de Reyes in Old Town San Diego
- Gift baskets from Alabama, California, Hawaii, Minnesota, Missouri, New Jersey, Oklahoma, Salcor Inc., StateFoodSafety.com, and Texas
- Grand Canyon and Ranches of Colorado books
- 100 Years, 100 Chefs, & 100 Recipes cookbook and a Chef John Folse autographed Louisiana seafood cookbook
- Black and white framed scenic photograph
- Salem, Massachusetts, sweatshirts
- Famous environmental health “Top Ten” t-shirt

Perhaps the most interesting items were two sets of Queen Elizabeth’s Diamond Jubilee plates, book, and miniature British flag.

NEHA and NEHA staff also donated Silent Auction items. In addition to donating NEHA shirts, a 2013 AEC registration and four hotel nights in Washington, DC, were donated, which ended up being the highest bid item. NEHA staff contributed an iHome Bluetooth keyboard case for iPad 2, beaded jewelry, and the famous NEHA Inspector Spock/Sam O’Day autographed red shirt. In addition, 16 pieces of fashion jewelry were donated by NEHA during a Silent Auction fundraiser held in the Denver office in April. NEHA received several free pieces when staff purchased jewelry from a catalog—and as a bonus, NEHA’s board of directors contributed to the orders. Thanks again to NEHA’s board! The total amount received from the Silent Auction for the jewelry was $485.

NEHA thanks the generous donors and attendees who helped to make this year’s Silent Auction a success!

Do Business Here!  Visit neha2013aec.org for information.  
Connect with environmental health professionals needing your products and services: exhibit, sponsor, and/or advertise at the NEHA 2013 AEC & Exhibition.
The Annual UL Event

At the Annual UL Event, attendees explored a floating city at sea and relived nearly 50 years of world history aboard the longest-serving Navy aircraft carrier of the 20th century while visiting the USS Midway Museum. The event featured an enjoyable tour of the historic aircraft carrier, a delicious catered dinner on the hangar deck, and other entertaining features such as private access to the flight deck, which made for some breathtaking views of the sun setting over the ocean!

Golf Tournament Highlights

The beautiful golf course at Riverwalk Golf Club was the venue for this year’s Golf Tournament. Formerly known as the Stardust Country Club, the course entertained a myriad of golf’s legends while hosting the PGA tour during the ‘50s and ‘60s. Six attendees took on the challenge of this course that featured undulating fairways, waterfalls, and well-protected bent grass greens.

The AEC was packed with many opportunities to network with fellow attendees—be it at the Ice Breaker, Networking Luncheon, Exhibition, Student Mentoring Program, the various meetings and focus groups, or in the hotel hallways!

The President’s Banquet closed the AEC with the traditional passing of NEHA’s presidency from Mel Knight (left) to Brian Collins (right).
Keynote

NEHA’s selection of the keynote speaker is always intentional. This year, NEHA sought out an individual to explore what the future world of work—and a profession like environmental health—would look like. NEHA was pleased to have Thomas Frey, Google’s top-rated futurist and author of Communicating with the Future: How Re-engineering Intentions Will Alter the Master Code of Our Future, as the 2012 keynote speaker.

Frey devoted a great deal of his presentation to depicting what the future is likely to look like. He gave context to his presentation by focusing on the dramatic explosion of both information and technology advances. It was against this background of overwhelming amounts of information and un-understandable advances in technology that he then directed his attention to the environmental health profession. He observed that our culture has long held the belief that we each have a personal responsibility to safeguard our lives and that we do that by checking things out before we buy them, eat them, use them, etc. This perspective fits nicely into the phrase we are all familiar with—“buyer beware.”

In the world of today, however, it has become quite challenging for the lay public to draw out trustworthy facts from reams of contradictory information. This has made it increasingly difficult for the average person to exercise appropriate caution and make decisions that are in one’s health interests. Therefore, professions like environmental health have become increasingly important as it is now being looked to as the trusted authority for informing and even protecting people in ways that they can no longer do themselves.

Frey’s message spoke quite directly to the importance of environmental health in a future that is becoming more and more characterized by excessive information and technological advances that can be both helpful and harmful.

Awards & Honors

Walter S. Mangold Award

For only the sixth time since 1956, no one received NEHA’s highest honor, the Walter S. Mangold Award, as no nominations were submitted. NEHA encourages all members to consider nominating an individual who exemplifies the dedication and commitment to environmental health and the profession that is honored through this award. Nomination information can be found at neha.org/about/awardinfo.html.

Certificates of Merit

Certificates of Merit are awarded to affiliate members who make exemplary contributions to the profession of environmental health. Each affiliate sets its own criteria for recognition, so recipients do not need to be NEHA members. For 2012, the following winners were announced.
- Jamaica—Pauline Ellington
- Louisiana—Henry Graham
- Michigan—Alan Hauck, RS
- New Jersey—Paschal Nwako
- Uniformed Services—LCDR Katie Noonan Hubbard
- Wyoming—Stephanie Styvar

A. Harry Bliss Editor’s Award

Thomas H. Hatfield, DrPH, REHS, DAAS

Dr. A. Harry Bliss was editor of the Journal of Environmental Health in 1969, the year this award was first presented. When he retired, the award was named after him to honor his 40 years of involvement in Journal production. NEHA often gives this annual award to outstanding writers and columnists, but the award may also go to individuals who, through other significant contributions made to the Journal, advance the cause and interests of both the association and the profession.

This year, NEHA is delighted to announce that the 2012 recipient of the A. Harry Bliss Award is Dr. Thomas H. Hatfield. Dr. Hatfield has been a long-time contributor to the Journal as an author and peer reviewer. He has been named the recipient of this award before. He is again being given this honor for the dedication and hard work he has shown this past year as one of the Journal’s newly appointed technical editors. Dr. Hatfield selflessly volunteered his time last fall to assist the Journal in getting through a backlog of manuscripts and continues to serve in this capacity as part of the Journal’s technical editor team. His reviews and publication decisions are based upon his vast expertise in the field of environmental health and science and are thoughtful and well reasoned. Dr. Hatfield is a professor and chair of the Department of Environmental and Occupational Health at California State University, Northridge. Dr. Hatfield’s technical editor work has ensured that quality material that is relevant, diverse in topic, and purposeful appears in the Journal. Dr. Hatfield is truly deserving of this award, as he is a tremendous asset to the Journal department.

NEHA/AAS Scholarship Awards

NEHA supports students in many ways. One way involves financial tuition support through
a special scholarship program that is cosponsored by NEHA and the American Academy of Sanitarians (AAS). A special scholarship committee chaired by NEHA Past President Jim Balsamo manages the scholarship program. The following scholarships were presented on behalf of the committee:

- $2,000 graduate scholarship to Ryan A. Lester from the University of Kansas
- $1,000 undergraduate scholarship to Jessica K. Roff from Ohio University
- $1,000 undergraduate scholarship to Heather Noelle Schmidt from Dickinson State University
- $1,000 undergraduate scholarship to Rosalie M. Peterson from Dickinson State University

**Walter F. Snyder Award**

Harry E. Grenawitzke, RS, MPH, DAAS

NSF International and NEHA honored Harry E. Grenawitzke with the 2012 Walter F. Snyder Award. This award is given in honor of NSF’s cofounder and first executive director, and it recognizes outstanding contributions to public health and the environment. Please see the accompanying story on page 70, which details Mr. Grenawitzke’s career and contributions to the profession.

**Sabbatical Exchange Award**

Dhitinut Ratnapradipa, PhD, MCHES

NEHA offers a wide-ranging opportunity for professional growth and the exchange of valuable information on the international level through its longtime Sabbatical Exchange Program. The recipient of this award may go either to England, in cooperation with the Chartered Institutes of Environmental Health, or to Canada, in cooperation with the Canadian Institute of Public Health Inspectors. Underwriters Laboratories, Inc. (UL) currently sponsors the sabbatical.

The award jury this year decided that the sabbatical award should be given to Dhitinut Ratnapradipa, assistant professor in the Department of Health Education and Recreation at Southern Illinois University. Dr. Ratnapradipa will be conducting his sabbatical in England. He will be studying environmental health impacts of climate change, focusing specifically on risk communication. He also hopes to give a series of lectures while there.

**Excellence in Sustainability Award**

Now in its fifth year, the Excellence in Sustainability Award, which reflects NEHA’s commitment to the promotion and practice of sustainability, is drawing an outstanding list of applicants from across the county. This year, the sustainability committee has chosen an exemplary program that “shows the way” for communities across the country.

The Atlanta Regional Commission’s (ARC) Green Communities Program is the recipient of the 2012 NEHA Excellence in Sustainability Award. The ARC Green Communities Program is a technical assistance and voluntary certification program for jurisdictions in the ARC 10-county planning area. The program is intended to foster greater environmental stewardship in metro Atlanta by providing technical assistance to local governments and recognizing those communities that invest in programs leading to a more sustainable region. Since its official kickoff in 2009, 16 local governments in the region have been certified as Green Communities and are making great strides towards reducing their impact on the environment. In addition, several other state-level sustainability certification programs across the U.S. have been modeled after ARC’s Green Communities program.

UL generously sponsored an award memento and a $500 honorarium to the winners of this year’s award.

**Dr. Neil Lowry Memorial Award**

The Dr. Neil Lowry Memorial Award honors and recognizes public health officials who have made outstanding contributions to advance the public’s healthy and safe use of recreational water. The award is given by the Association of Pool and Spa Professionals (APSP) in memory of Dr. Lowry, a long-time member of APSP, who influenced the pool and spa industry for over 25 years as a consultant to government and private industry. The award was presented to the Sacramento County Environmental Management Department. Colleen Maitoza, supervising environmental specialist, accepted the award for the department. The Sacramento County Environmental Management Department plans to use the award to provide more workshops for operators and service companies to continue reduction of major violations; create brochures and flyers to support their educational offerings; and develop and fund a survey to identify deficiencies in knowledge, and then tailor training based on results.

**Student Research Presentations**

Every year, the Association of Environmental Health Academic Programs (AEHAP) and CDC’s National Center for Environmental Health (NCEH) sponsor and financially support undergraduate and graduate student research presentations. Thanks to a generous donation from NCEH, six students and their faculty mentors had the opportunity to present their research at the AEC.

Presenting the student research awards were CAPT Michael Herring of the U.S. Public Health Service/CDC/NCEH and Dr. David Gilkey from Colorado State University. Each student participant listed below received a $500 award, a plaque, and a stipend of up to $1,000 to cover travel and research expenses.

**An Evaluative Study of Lead Exposure Sources**

SF International and NEHA presented the prestigious Walter F. Snyder Award to Harry E. Grenawitzke, RS, MPH, DAAS, at the 2012 AEC in San Diego. This award, given in honor of NSF International’s cofounder and first executive director Walter F. Snyder, is presented annually in recognition of outstanding contributions to the advancement of environmental health.

Grenawitzke was honored for his more than 40 years of significant and lasting contributions to the fields of public and environmental health at the international, federal, state, and local levels. His expertise and commitment to environmental health led to important roles in several public health organizations, including NEHA, the Michigan Environmental Health Association (MEHA), the Canadian Institute of Public Health Inspectors, the American Academy of Sanitarians, and NSF International’s Council of Public Health Consultants. His work in mentoring colleagues and developing innovative programs and standards that protect public health strengthened these organizations and led to lasting improvements in environmental health.

As an active member of NEHA and MEHA since the 1970s, Grenawitzke served as chairman of several committees and was elected president of NEHA in 1989. He was well known for his ability to develop cooperative agreements between international communities and U.S. environmental health professionals, organizing the first cooperative conferences with Canada and England.

Grenawitzke’s personable and effective teaching and training skills have played a key role in his career. Starting in 1989, he became an adjunct professor at the University of Michigan School of Public Health. He also worked with university officials to develop the environmental health program at Central Michigan University.

In 1990, Grenawitzke joined public health and safety organization NSF International to manage its auditing and training programs. He served in many leadership roles at NSF, including vice president of Regulatory Affairs and Field Services, a role that truly utilized all of his passion for environmental and public health policy. He also served on the NSF International Council of Public Health Consultants, which advises NSF in the development of standards and environmental health programs.

Grenawitzke’s expertise was often sought by international authorities. In 1988 and again in 1991, he joined a team of experts who viewed the Chernobyl disaster area at the request of Russian officials. After the investigation, Grenawitzke consulted with Russian scientists regarding the environmental health impacts that resulted from the nuclear accident. In 1992–1993, he visited Mexico City to highlight the role harmonized standards could play in the North American Free Trade Agreement.

Since 2003, Grenawitzke has worked as a public health consultant and food safety trainer. He works closely with the U.S. Department of Justice to elevate standards and living conditions at U.S. correctional institutions. He also teaches courses on hazard analysis and critical control point (HACCP), safe quality food, internal auditing, and NSF/ANSI food equipment standards.

Kevan P. Lawlor, NSF International president and CEO, congratulates Grenawitzke on this well-deserved honor: “Harry Grenawitzke’s career achievements reflect the principles expressed by Walter F. Snyder and the public health mission of NSF International. His work as a celebrated public health advocate, trainer, and consultant, as well as past work with local, federal, and international environmental health organizations, demonstrate his strong commitment to the promotion of public and environmental health. These accomplishments make him a very worthy recipient of the Walter F. Snyder Award.”

Grenawitzke received the 2007 Davis Calvin Wagner Award from the American Academy of Sanitarians and the 2002 Walter S. Mangold Award from NEHA. With the addition of the Walter F. Snyder Award for achievement in the advancement of environmental health, he has earned the triple crown of environmental health awards.

“Harry Grenawitzke is a respected leader in both the public and private sectors of the environmental health field. He is also highly regarded and liked because he has mentored numerous environmental health professionals, helping them to realize their potential. His leadership in developing effective organizations and more responsive programs both in the field and in educational institutions has made his contributions to professional improvement enduring. Harry is an inspiring model of professionalism and for this he is deserving of the Walter F. Snyder Award,” said Nelson Fabian, executive director and CEO of NEHA.
Carbon Monoxide Exposures Associated With the Operation of Recreational Watercraft
Megan Smith, Undergraduate Student, Boise State University, Boise, ID
Facility Mentor: Dr. Dale Stephenson

Biomethane Production From Corn Stover

Samuel J. Crumbine Consumer Protection Award
Salt Lake Valley Health Department, Salt Lake City, Utah
The Samuel J. Crumbine Award is a prestigious national award given annually to a local food protection agency that demonstrates excellence and continual improvement in a food protection program. The award is named in honor of Dr. Samuel J. Crumbine, a sanitarian, physician, and public health pioneer who was renowned for his innovative methods of improving public health protection. It is supported by the Conference for Food Protection in cooperation with the American Academy of Sanitarians; the American Public Health Association; the Association of Food & Drug Officials; the Foodservice Packaging Institute, Inc.; the International Association for Food Protection; the National Association of County and City Health Officials; the National Restaurant Association Solutions; NEHA; NSF; and UL.

The award selection jury was impressed with Salt Lake Valley Health Department’s work as a pioneer in FDA’s Voluntary National Retail Food Regulatory Program Standards, its close collaboration with academia, and state-of-the-art Web site showing inspections, ratings, and the ability to compare establishments. The award-winning application can be found online at fpi.org. Bryce C. Larsen, manager of the Bureau of Food Protection, accepted the plaque on behalf of Salt Lake Valley Health Department.

Past Presidents Award
Each year, the Past Presidents group, comprised of former NEHA presidents, identifies a hero for the profession who accomplishes much on behalf of environmental health, but who does a lot of work behind the scenes. This year, the presidents identified two, longtime NEHA members and friends who made enormous contributions to our field of practice. They were happy to publicly recognize Joe E. Beck, RS, DAAS, from Eastern Kentucky University, and CAPT Charles S. Otto, III, MPA, RS, CP-FS, from CDC’s NCEH.

Presidential Citations
A Presidential Citation is a special award given to individuals who have made exemplary contributions to NEHA during the president’s term of office. President Mel Knight presented Presidential Citations to the following individuals.

Debbie Bankston
Angelo Bellomo
Darryl Booth
Brian Collins
Bob Custard
Nelson Fabian
Tom Gonzales
Tom Hatfield
Michael Herring
Scott Holmes

Martin Kaslin
Diane Knight
Melanie Knight
Mark McMillan
Pam Muse
Terry Osner
Liz Pozzebon
Vince Radke
Henley Scarlett

Decade Scholarship Awards
Each year, Decade Software Company gives away scholarships to environmental health professionals who might not otherwise be able to attend the AEC. This year, 56 individuals from 43 different health departments applied for 15 Decade Software scholarships. A panel of Decade Software executives along with executives and elected officials of NEHA scored the short-essay responses of the applicants. The essay provided an opportunity for applicants to express their innovative ideas for the industry. Fifteen applicants receive a $700 scholarship. This year’s scholarship winners are listed below.

Kerry Abdullah
Judine Ablang
Wayne Fox
Jillian Gibbs
Donald Hwang
Andrea Jordan
Matthew Krenz
Teresa Lee

Kelly McCoy
Paschal Nwako
Ruchi Pancholy
Morgan Riley
Amber Sturdivant
Marie Woodin
Denise Wright

NEHA Scholarship Awards
NEHA provided 21 full conference registration scholarships to attend the AEC. These scholarships were available to NEHA members working within the field of environmental health. Besides meeting basic qualifications, applicants were asked to explain why they were in need of these scholarships, as well as how they would benefit from attending the AEC. Congratulations to the scholarship recipients listed below.

Christina Baghdikian
Veronica Becerra
Eric Bradley
Everette Brooks, III
Jodi Brounstein
Patricia Bygrave-Johnson
Norbert Campbell
Evelyn Hoban
Kristina Holtz

Misty Joy
Bilal Korin
Valerie Lane
Leslie (Ley) Miyashiro
Michelle Rhone
Art Sheyko
Antoinette Stetzenmeier
Christine Sylvis
