New Policy Statement Approved to Support the Profession

In January 2023, the Board of Directors of the National Environmental Health Association (NEHA) approved an update policy statement on the Registered Environmental Health Specialist/Registered Sanitarian (REHS/RS) credential. Environmental health programs carried out by REHS/RS credentialed individuals, as well as other credentialed personnel, serve to prevent illness, injury, and death. Credentialed personnel within these programs work to improve the health and quality of life of people living in their communities. Their services prevent adverse health outcomes and help communities prepare for, respond to, and recover from disease outbreaks and disasters.

NEHA supports the credentialing of the environmental health workforce, in particular people who earn the REHS/RS credential. This credential is recognized in many states and the District of Columbia. Additionally, some jurisdictions have local environmental health credential programs that are required for the practice of environmental health.

A credentialed environmental health workforce is essential to meet the demands required of federal, state, local, tribal, and territorial environmental health agencies. As such, NEHA supports the following:

- Health is the basis of prosperity in every community.
- Safe food, safe drinking water, clean air, safe sewage disposal, emergency response, and healthy living and workplace environments are basic necessities for communities.
- Assuring health equity and a healthy living environment requires a workforce of well trained and technically competent environmental health specialists and sanitarians who are credentialed.
- Environmental health agencies and industry partners should strive to attract and retain credentialed and trained environmental health professionals to provide capacity and quality in their environmental health programs.

The policy statement was drafted by the NEHA Credentialing Committee and NEHA staff. The policy will sunset in January 2026. Visit www.neha.org/policy to view the full statement, as well as other policy statements on body art, climate change, food safety, preparedness, vector control, water quality, and more.

NEHA Staff Profiles

As part of tradition, we feature new staff members in the *Journal* around the time of their 1-year anniversary. These profiles give you an opportunity to get to know our staff better and to learn more about the great programs and activities going on in your association. This month we are pleased to introduce you to three NEHA staff members. Contact information for all NEHA staff can be found on pages 44 and 45.

Joetta DeFrancesco

I joined the NEHA Entrepreneurial Zone team in April 2022 as the Retail Program Standards coordinator working on the NEHA-FDA Retail Flexible Funding Model (RFFM) Grant Program. Coming from a state regulatory agency, I was excited to begin work as the importance of this grant program and the impact of the funds are well understood.

My role here involves supporting grantees to aid in the successful completion of their grant work. This support can be anything from reviewing grant reports to developing guidance to aiding jurisdictions in meeting the Voluntary National Retail Food Regulatory Program Standards or reaching out to our stakeholders to share information. It is a job I not only enjoy but also get the pleasure of working with a remarkable group of professionals to help improve food safety nationwide.

My background includes 14 years with a state regulatory agency, most recently running retail quality assurance and training with a team that was responsible for all aspects of the training and certification process for all new inspection staff. Prior to working for the state, I spent over 20 years working in both restaurant and private club food service operations. Additionally, I have taught as an adjunct instructor for both business and hospitality courses.

When not working for NEHA you can find me gardening, spending time with friends and family, taking my camper on adventures, or enjoying countless other hobbies.

Adrienne Gothard

After I received my undergraduate degree in nutrition and dietetics from the University of Northern Colorado, I began my professional career as a clinical dietitian in an acute care hospital. During my 10 years at the hospital, I wore many hats while providing nutritional care to patients in clinical and food services. I greatly enjoyed being

able to care for patients and serve as a leader in the nutrition department. I realized, however, that I wanted to be part of preventing disease, not just treating it.

This realization led me to begin graduate studies in public health. I started my journey with NEHA as an intern while I was finishing up my master of public health from the University of Nebraska Medical Center. From the moment I started, I knew that NEHA was an organization where I could really see myself thriving and making a difference. I was hired full time in April 2022 to assume the role of internship coordinator for the National Environmental Public Health Internship Program. I love getting to work with students who are passionate about environmental health and connecting them with

NEHA NEWS

opportunities that help them grow. Through their passion and experiences, I get to learn more about the world of environmental health.

I am a Colorado native and I love the life that I have built for myself here with the help of my husky named Finn. My favorite things to do are travel, go boating or camping with friends, and play any type of game—especially volleyball and yard games. My ideal day includes the company of friends or family, good food, and a small dose of friendly competition!

Elizabeth Grenier

I am a senior project coordinator at NEHA. I primarily support our events but also assist with other projects. I oversee and coordinate all of the planning and logistics for our Retail Program Standards Symposium (RPSS). I work closely with all of the teams that are involved, including content and education, marketing, and the NEHA-FDA

RFFM Grant Program leadership. My job is to ensure nothing is overlooked so that we produce a seamless and thorough event. I also provide support to our Annual Educational Conference & Exhibition. I handle all presenter and moderator logistics and communications, as well as provide any additional assistance to overall

conference planning and on-site support. Additionally, I assist with other NEHA-sponsored meetings and events, as needed. Lastly, I support the NEHA-FDA RFFM Grant Program in various capacities.

I am passionate about planning events and all of the logistical aspects that are involved in producing an event. I love that my efforts lead to an experiential product that provides a space and purpose for others. Additionally, I really enjoy that every event is different, held in a new location, produced with diverse elements, and with different needs and new challenges. So each day is exciting and unique. I look forward to planning more events—possibly larger or more complex—to further engage our audience.

I graduated from California Polytechnic State University, Pomona, with my bachelor's of science in international business and marketing management. I have had a diverse professional experience, which I think has prepared me for the role I am currently in. I have worked in hotel hospitality in various capacities, which has given me a great deal of understanding of hotel operations, contracts, and food and beverage—all integral elements for events. I have also worked at the university level, which has provided a wealth of knowledge in the world of grants, grant cycles, and reporting. The NEHA-FDA RFFM Grant Program is a federally-funded program that supplements the RPSS. Producing an event within the parameters of a grant brings on a whole new set of challenges that must be understood before you can start planning.
