

Enhancing Safety in Private Drinking Water Systems

VIRTUAL CONFERENCE
OCTOBER 16-17, 2018

- Track 1: Challenges and Opportunity
- Track 2: Innovation in Outreach and Education
- Track 3: Emerging Contaminants
- Track 4: Effective Partnerships

The Private Water Safety – Enhancing Safety in Private Drinking Water Systems Virtual Conference is a highly informative forum that brings together environmental public health professionals and water safety specialists to discuss emerging issues and solutions, as well as the latest information, resources, tools, and training about private drinking water. The conference environment will be open all day on October 16 and 17. Live chats and sessions are not recorded and need to be attended at their scheduled time.
