Cottage Foods, Food Freedom 2021

Last Updated: March 03, 2021

Cottage Foods, Food Freedom
NEHA has been able to identify 43 bills in the 2021-2022 state legislative sessions that relate to cottage foods – that is, bills that relax or eliminate food safety requirements for retail foods.

Certain bills seek to reform prior legislative efforts to exempt foods, to limit the types of retail establishments or food producers that may be exempted from food safety oversight. But most seek the opposite, to expand the range of food producers and retail establishments that may sell food exempt from any governmental oversight.

Several states introduced legislation regarding food freedom, meaning freedom for state food safety oversight. Arkansas is seeking to enact SB 248 which will create the Food Freedom Act, exempting homemade food or drink products from licensure, certification and inspection requirements. Minnesota's HB 433 Food Freedom Act exempts homemade food sellers and preempts the local food safety ordinances from applying to homemade food sellers.

Mississippi Food Freedom Act HB 588 sought to allow on-farm sales of homemade food products, but failed. Oklahoma SB 833 Food Freedom Act seeks to exempt homemade foods from state licensure, permitting, inspection, packaging and labeling requirements. Tennessee's HB 813 and SB 693 seek to recognize the right of individuals to produce, procure, and consume homemade foods of their choice free from unnecessary and anticompetitive regulations. The sponsors claim it will foster small businesses, innovation, and economic growth. Wyoming continues to expand its food freedom law. HB 118 will include eggs into the state's food freedom exemptions.

Arkansas HB 1118 will expand the state’s cottage food law. This bill provides that cottage food sales through the internet are exempt from the definition of food service establishment. Indiana's HB 1103, SB 185 Home Based Vendors Act allows for such foods to be sold via the internet and delivered by a third party to the end consumer. Montana's SB 199 permits certain homemade food producers from food licensure, permitting, certification, packaging, labeling and inspection regulations. It will also allow the sale of raw milk and suspend state meat inspection.

Missouri's HB 357 allows cottage food production operations to sell food over the internet. SB 235 will permit the sale of raw milk or cream. Maryland's HB 1077 provides an exemption from a food establishment license for operators of open-air food markets.
Title
Cottage food production operations, baked goods and roasted coffees, exempt from obtaining food service permit from health department, labeling of baked goods, other food items, food safety course required, Sec. 22-20-5.1 am'd.

**Title**

SB248 - TO CREATE THE FOOD FREEDOM ACT; AND TO EXEMPT CERTAIN PRODUCERS OF HOMEMADE FOOD OR DRINK PRODUCTS FROM LICENSURE, CERTIFICATION, AND INSPECTION.
Cottage food operations.

AB 1144, as introduced, Robert Rivas. Cottage food operations. Existing law, the California Retail Food Code, establishes uniform health and sanitation standards for, and provides for regulation by the State Department of Public Health of, retail food facilities, as defined, and requires local health agencies to enforce these provisions. The code defines "cottage food operation" to mean an enterprise that does not have more than one full-time employee within the registered or permitted area of a private home where the cottage food operator resides and where cottage food products are prepared or packaged for direct, indirect, or direct and indirect sale to consumers, and prohibits the operation from having more than $50,000 in gross annual sales in the calendar year. Existing law requires a "Class A" cottage food operation to register with the local enforcement agency in accordance with specified provisions, and to renew its registration annually. Existing law requires a "Class B" cottage food operation to obtain a permit from the local enforcement agency, as specified, and authorizes the operation to engage in the indirect sales of cottage food products within the county in which the operation is permitted. Existing law requires a registration or permit to be valid only for the person, location, type of food sales, and distribution activity specified by that registration or permit, and requires an operation to properly label all cottage food products with the operator's name and registration or permit number, among other things. A person who violates any provision of the code is guilty of a misdemeanor, except as otherwise provided, and violations of the California Retail Food Code are enforced by local health officers. This bill would, among other things, increase the maximum gross annual sales amount to $100,000, and would require that amount to be annually adjusted for inflation based on the California Consumer Price Index. The bill would also require a "Class B" operation to renew its permit annually, and would authorize a "Class B" operation to engage in indirect sales of cottage food products throughout the state. The bill would delete type of food sales and distribution activity from the list of limitations for which a registration or permit is valid. The bill would prohibit the local enforcement agency from requiring a cottage food operation to submit for review more than one sample product label per food category, as specified, and would authorize the operation to sell any cottage food products within a food category that has an approved sample product label from therein. The bill would additionally require the operation to include on the cottage food product label, the phone number and email address of the cotta... (click bill link to see more).
