

Environmental Health

Dedicated to the advancement of the environmental health professional

Volume 84, No. 2 September 2021

ABOUT THE COVER

This month's issue features a two-part series on the Zika virus. The first part, "The Zika Virus Threat and Prevention Challenges" explores an all-hazards and One Health approach to pandemic and global epidemic

prevention and mitigation. The second part, "Public Health Professional Perspectives on Zika Virus Preparedness" provides responses of environmental health professionals from a survey on the Zika virus and infectious diseases. The cover for this issue uses a word cloud to highlight the topics of the two-part series as the background for the primary mosquito reservoir of the Zika virus (*Aedes mosquitoes*) and a detailed image of the Zika virus.

See pages 8 and 20.
